THE REPORT

OF THE

PRESIDENT OF QUEEN'S COLLEGE, BELFAST,

FOR THE

SESSION 1892-93.

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

MAY IT PLEASE YOUR MAJESTY,

I have the honour to present to your Majesty my annual Report on the condition and progress of this College during the academic year 1892-93.

I.—THE PROFESSORiate

In several of my Annual Reports I have had occasion to refer to the good fortune of the College in having, as its Professors, a body of men most eminent in their several departments, and thoroughly devoted to the great work which has been committed to them by your Majesty. The experience of the past year amply confirms the opinion which I have thus expressed from time to time.

I have to report that in May last Professor Redfern placed in my hands his resignation of the Chair of Anatomy and Physiology which he had held for the past 33 years. The services which he rendered, during this long term, to the department over which he presided, as well as to the entire Medical School of the College, could scarcely be over-estimated. Nor were his labours and sympathies confined to the department of Medicine. The whole College was the constant object of his solicitude, and whatever services he was asked or was able to render to it were most ungrudgingly bestowed. I am glad to be able to state that, in order to commemorate his long connection with us, and to mark the respect and regard in which he has uniformly been held by his colleagues and the public, a movement has been set on foot for having his portrait painted and hung in the Examination Hall.

In the month of July, death deprived us of one of our oldest professors, Dr. Robert Foster Dill, who had, for twenty-five years, occupied the Chair of Midwifery. His ability, great geniality, and strong individuality will secure for his name long remembrance within the walls of the College with which he was so long connected, and among the many generations of students who sat at his feet.

During the year a new Chair, which is to bear the name of "The Dunville Professorship of Physiology," was established in the College, and provided with an endowment of £240 per annum, by the Trustees of the Sorella Trust, a trust created by the late Wm. Dunville, Esq., of this city. The Trustees were enabled to

found this Chair by the munificent action of R. G. Dunville, Esq., D.L., who acquired from them a very valuable piece of ground belonging to the Trust, and presented it, at a total cost of over £13,000, to the Corporation of Belfast, to be maintained as a public park. The College Statutes have been altered, under your Majesty's Royal Sign Manual, in order to allow of the foundation of this Chair, which is the first established in the College by private beneficence. In addition to the other duties of his Professorship, the Dunville Professor is to deliver annually a short course of public lectures on Hygiene, or some subject connected therewith, at such nominal charge for admission, if any, as may be approved by the College Council. By the establishment of this Chair Anatomy will, for the first time in the history of the College, be enabled to enjoy the services of a Professor wholly devoted to that very important subject. There can be no doubt that great advantage will accrue to our Medical School, to the entire College, and to the public generally, from the foundation of this Professorship, and I trust that the example, which has been set by the gentlemen who have founded it, will be followed by others of our fellow-citizens who are interested in the promotion of education.

II.—THE STUDENTS.

The numbers of students in attendance during the past Session were—in the Faculty of Arts, 166; in the Faculty of Medicine, 243; in the Faculty of Law, 24; in the School of Engineering, 13. Making allowance for four students who attended in more than one Faculty, the entire number on the College books for the year was 442, of whom 414 were matriculated, and 28 non-matriculated. The great majority, viz., 390, came from various parts of Ulster, 9 from Leinster, 9 from Connaught, 5 from Munster, 15 from England, 4 from Scotland, 1 from the Isle of Man, 1 from France, 2 from Spain, 3 from India, 1 from Ceylon, and 2 from Australia. 236, or considerably more than half of them were over twenty-one years of age, 206 being younger. The number of lady students was 8, and the number of freshmen 97. The demeanour and discipline of the entire body was most satisfactory.

I have received the following reports from the Deans of Residences as to the oversight which they took of the moral and religious welfare of the students during the Session.

"DEAR MR. PRESIDENT,—I have much pleasure in reporting to you on the conduct of the Church of Ireland Students in Queen's College, Belfast, during the past Session.

From my constant observation, and inquiry at their lodging places, I am enabled to say that the moral conduct and habits of the Students were most excellent. A gentlemanly and high-spirited tone is evidently influencing the young men.

I remain, dear Mr. President,

Very faithfully yours,

S. EDWARD BUSBY, Clk., LL.D.,
Dean (I.C.), Q.C.B."

"DEAR SIR,—I beg to report that the conduct and character of the Presbyterian Students attending Queen's College, Belfast, as far as known to me, have been during the past Session exceedingly good.

I am, yours faithfully,

MATTHEW LEITCH,

Dean of Residences of Presbyterian
Students."

"In due course, after the opening of the Session, I received from the Registrar a list of twenty-five Students.

About two-thirds of the number reside with their parents or guardians in Belfast or the immediate neighbourhood. With regard to the others, I made careful inquiry concerning their respective places of abode, and took such steps as were necessary to secure for them proper pastoral supervision and attention. I have every reason to believe that the conduct of all the Students has been very satisfactory.

OLIVER M'CUTCHEON, D.D., LL.D.

Dean of Residences of Methodist
Students."

"I have to report that there are at present six gentlemen, all medical Students, under my care, attending Queen's College. Some of these gentlemen reside with their parents or friends, but I am quite satisfied that these occupying lodgings are respectably domiciled.

Nothing has come before me to render me in any way dissatisfied with the conduct of any one of these gentlemen.

The demands on the time of my Students, both in Hospital and College work, have somewhat limited their opportunities of meeting me; but in all that I could reasonably expect, or have called on them to undertake, I have found them quite willing to accede to my wishes.

T. H. M. SCOTT, M.A.,

Dean of Residences for Association of
Irish Non-Subscribing Presbyterians."

The Societies formed by the Students amongst themselves for their own improvement had, I am happy to know, prosperous sessions during the year—the Literary and Scientific Society under the presidency of Mr. J. Sinclair Baxter, M.A., and the Medical Students' Association under that of Dr. J. S. Morrow.

III.—ACADEMIC SUCCESSES.

There was during the Session the usual keen competition for the College Scholarships and prizes. It is our happiness to possess, in addition to the foundation scholarships, several others of a most valuable character, which have been founded by wise and public-spirited benefactors, and which at once encourage the pursuit of learning amongst us and preserve the names of those by whom, or in whose memory, they have been founded. I refer, for example, to the Pakenham Scholarships founded by the Rev. Arthur Hercules Pakenham, of Langford Lodge, in memory of the late Major-General the Hon. Sir Hercules Robert Pakenham and the Hon. Emily Lady Pakenham; the Sullivan Scholarships established under the will of the late Robert Sullivan, Esq., LL.D.; the Porter Scholarships established under the will of the late John Porter, Esq., of Belfast; the Dunville Studentships founded by the late Wm. Dunville, Esq., of Belfast; the Andrews Studentship founded to commemorate the name and services of Dr. Thomas Andrews, F.R.S.; the Blayney Exhibition derived from funds bequeathed by the late Lord Blayney; and the M'Kane Medal founded under the will of the late Professor M'Kane. The answering on which these and all our honours have been awarded during the year has been of a very high character.

On several occasions I have called attention to the remarkable successes of students of this College at the Universities and elsewhere, and it is my pleasing duty now to refer to another series of such successes gained during the past year.

Most of our students resort for their degrees to the Royal University, where they have to compete with candidates from all parts of Ireland and from other countries, and I think the following statement of the results of the examinations of this University during the year, so far as this College is concerned, is very noteworthy.

At the First University Examination in Arts, the students of this College gained many First Honours in Latin, in Greek, and in Experimental Physics. But in Mathematics their success was most remarkable. In this subject, they carried off all the First Honours that were awarded, except one, or five out of six, including the first of First. At the Second University Examination in Arts, they also gained many First Honours in French, in Mathematical Physics, and the first of First in Experimental Physics. But it was in Mathematics again that they most of all distinguished themselves, gaining every First Honour, without exception, that was awarded in that subject. At the still higher, and, of course, more difficult and important Examinations for the B.A. Degree, this series of victories was still continued. Here, a Belfast student was first of First in Mathematics; another, first of First in Ancient Classics; and another, first of First in Experimental Science. One gained the first of the First Class Exhibitions, and two others, following closely on his lead, Exhibitions of similar value, while three others gained

other high and valuable Exhibitions. One Student gained a First Class in Logic, Metaphysics, Ethics, and History of Philosophy; and another, a First Class in Civil and Constitutional History, Political Economy, and Jurisprudence. Still pursuing the course of the Royal University Examinations, I find that in those for M.A., out of four candidates who gained the Degree with First Class Honours, three were Students of this College, and one of the three made so brilliant an examination in Philology and Latin Composition that the Senate conferred on him the unusual honour of a special prize of £50. At the same Examinations, two Belfast men gained Studentships, worth £300 each, in Mathematical Science and Experimental Science, respectively. I take leave to say that this long list of triumphs is most noteworthy, and affords the best proof that could be given of the thoroughness with which the work of the College is carried on.

It is right that I should also refer to some of the successes gained during the year by students of our Medical School. At the First Examination in Medicine of the Royal University last summer, they gained some very high distinctions, including First Honours in Zoology, Botany, and Experimental Physics, and a First Class Exhibition, while at the Spring Examinations of this year, where there was an unusually keen competition, they won, on very high answering, several First Honours and Exhibitions.

I must also report some of the distinctions gained during the year by our School of Law. In my last annual Report I had the pleasure of referring to a series of honours gained by its students during the previous year at the Royal University, at King's Inns, and the Temple, honours so numerous and brilliant that I felt bound to say of them—"Seldom has any College been able within a single year to boast of such a number of honours gained by its students in law." It might have been expected that the experience of that brilliant year could scarcely be repeated, at all events quickly. But this year there is another series of victories to chronicle, which is almost as notable. For example, at the last Examinations of the Royal University for the degree of LL.B., Belfast men gained all the prizes that were awarded. At the Examinations held at King's Inns, prior to call to the Bar, one Belfast student gained the John Brooke Scholarship, the monetary value of which is £150, and another the twenty guinea prize, and a third *alumnus* of this College, at the Honour Examinations held in London by the Council of Legal Education, which are open to the students of the four Inns of Court, obtained the first place, along with a prize of £50, as well as the first place in Constitutional Law and Legal History, with a further special prize of £50. Our School of Law may well be proud of such a succession of triumphs.

A list of the distinctions which have been gained by Belfast students during the year at Oxford, Cambridge, and other Universities, is given in the appendix to this Report. Here I may only mention that two of them have gained mathematical exhibitions at St. John's College, Cambridge; that another has been

appointed Demonstrator of Animal Morphology at Cambridge, and another elected a Fellow of St John's,* while yet another was the winner at Oxford of the Chancellor's Prize for the best English essay.

IV.—THE COLLEGE BUILDINGS.

During the year some special works have been executed on the College buildings. The gas-lighting of the Examination Hall and Outer Hall has been entirely remodelled, with the result that both are now brilliantly lighted. The Gymnasium has been re-floored and re-fitted, and the Ball-court put into thorough order. A portion of the new building for the accommodation of the School of Chemistry, to which I referred in my last annual Report, has been in progress during the year, but it has not yet sufficiently advanced to allow of our making use of it. I may be allowed to express the earnest hope that not only will it soon be available for the purposes for which it is intended, but that the remainder of the building, as designed by the Board of Works, will be proceeded with at an early date, so that the entire department of Chemistry may be accommodated therein, and the rooms at present devoted to that subject left available for other uses for which they are much required.

The movement for the erection of a Students' Union, to which I also made reference in my last report, has been vigorously carried on during the year. A sum of over £3,600 has now been subscribed for the purpose, many of our graduates, and not a few of the residents of Belfast, having contributed most generously. A number of ladies have now, with much spirit, undertaken the task of organising a Fancy Fair in aid of the funds, and, judging from the manner in which they have entered upon their task, and from the reception which their proposals have met, there is every prospect of their efforts being crowned with signal success. The Union buildings, when erected, providing, as they will, a Hall for the meetings of the Students' Societies, a Reading-room, a Dining-room, and other apartments, will undoubtedly be a very valuable acquisition to the College.

While, however, we are thus adding to our buildings, it is my duty to state that the College is yet very far from being properly equipped in this respect, whether we look to the work which has been committed to it, and which it is doing with such vigour and success, to the number of students who resort to its class-rooms, or to the great and rapid strides which various branches of science have of late been making. It most urgently and specially needs, just now, Laboratories in various departments. The necessity for a Biological Laboratory I have again and again urged. A properly constructed and properly fitted Physical Laboratory is also much required. A complete Laboratory for the department of Pathology ought also to be provided, if that newly organised department is to have full scope for its work; and the need of a thoroughly equipped Physiological Laboratory is

* While this Report was passing through the Press, the news of the untimely death of this gentleman, Mr. H. D. Darbishire, was received with deep regret.

rendered more pressing than ever by the institution of the new chair in that subject. Then, again, the Natural History Museum urgently needs enlargement, and the department of Engineering requires a workshop fitted with proper apparatus for the teaching of mechanical engineering. All I can do in this report is to call attention, in the strongest and most emphatic manner in my power, to the pressing necessity which exists for meeting these wants at the very earliest possible period.

V.—THE COLLEGE LIBRARY

Continues to receive sedulous care. During the year about 1,000 volumes were added to it by purchase or presentation. It is now estimated to contain about 51,000 volumes. Last year the preparation of a new catalogue was resolved upon, and, after mature consideration, the services of a special Library Clerk were engaged for this purpose. For more than a year he has been devoting his entire time to the work under the supervision of the Librarian, and it is expected that shortly the Card Catalogue, which is first being aimed at, will be completed. It will undoubtedly prove a great boon to readers in the library.

VI.—STATISTICAL TABLES.

I have appended to this report a list of the names of the Visitors, the President, the Professors, the Deans of Residences, and other officials of the College, together with a series of tables showing (1) the Number of Students matriculated in Session 1892-93; (2) the Numbers and Religious Persuasions of the Students who have entered in each year since 1849; and the Numbers and Religious Persuasions of the Students who have attended in each year since 1849; (3) the Numbers attending in each Faculty during the Session now ending; (4) the Number of Students who came to the College from each of the provinces of Ireland, and from other places, during this Session; (5) the Ages of the Students in attendance; (6) the Number of Lectures given by each Professor during the Session, and the Number of Students attending each Class; (7) the names of the College Scholars and Prizemen for this Session; (8) a list of Degrees, Diplomas, and Honours obtained by Students of the College at the examinations of the Royal University of Ireland in 1892; (9) a list of sundry Students who have, since 1st January, 1881, obtained distinctions in Universities other than the Royal University of Ireland; (10) a Table showing the Length of Service, Salaries and other Emoluments of the Professors and Officers of the College; (11) a List of the Benefactors of the College since its foundation, with an account of their benefactions; and (12) an account of the Receipts and Expenditure of the College during the year ending 31st March, 1893.

All which is testified on behalf of the College by

Appendix to Report of the President

TABLE XI.—BENEFACTORS of the QUEEN'S COLLEGE, BELFAST,
since its Foundation in 1845.

ANNO.

1847. Presented by Charles Davis, Esq., a large oil painting of the Assassination of Peter the Martyr, by Atkins, being a copy of the original painting by Titian.

— Presented by Professor Craik, a portrait of Confucius.

1851. The Governors of the Armagh Observatory, with the sanction of Her Majesty, transferred to the Queen's College, the Transit Instrument and Astronomical Clock, which were formerly in the Observatory at Kew.

The Lords of the Admiralty, on the recommendation of the Astronomer Royal of England, acceded to an application from Professor Wilson for transferring to the College a Mural Circle by Jones, which had been in use at the Cape of Good Hope.

For the reception of these instruments an Observatory was erected on the College grounds, the expense having been defrayed by subscription.

1854. Presented by W. P. Wilson, Esq., M.A., former Professor of Mathematics in the College, a Bust of Sir Isaac Newton.

1855. Presented by Robert H. Lynn, Esq., London, an oil portrait of James the First of England, when a child, an oil portrait of Joannes Carolus, and an oil portrait of John Milton.

1860. An oil portrait of Hugh Carlisle, M.D., former Professor of Anatomy and Physiology in the College; presented by the subscribers.

1864. Given by R. M. Wilson, Esq., an Exhibition of Twenty Pounds to be conferred annually upon one or more of the most deserving unsuccessful candidates for a Scholarship of the First Year.

This Exhibition was awarded for eleven years.

1864. Given by the Royal Academical Institution, Belfast, two Exhibitions of Five Pounds each, to be conferred annually upon students from that Institution who have taken the highest places in the Literary and Science Divisions, at the Examination for Scholarships of the First Year.

1866. Given by John Charters, Esq., an Exhibition, value Fifteen Pounds, and two Exhibitions, value Ten Pounds each, in the Literary Division of the Faculty of Arts; also one Exhibition, value Fifteen Pounds, and two, value Ten Pounds each, in the Science Division of the Faculty of Arts, to be called the "Charters' Exhibitions," and to be annually awarded during ten years, at the Examinations for the Literary and Scientific Scholarships of the first year, to students who, during at least one year previous to their entrance into college, have been in continuous attendance at the Royal Academical Institution, and who have attained the standard of excellence required at the Junior Scholarship Examinations. Also, an Exhibition, value Fifty Pounds, tenable for one year, to be called the "Charters' Medical Exhibition," to be annually awarded during ten years, in connexion with the Belfast School of Medicine, by the Trustees of the "Charters' Educational Fund."

ANNO.

This Exhibition to be conferred by a Special Examination in Medicine and Surgery, chiefly of a practical character, and to be open to any Medical Student to compete, provided he does not possess either a Medical or Surgical qualification.

1866. An oil portrait of William Burden, M.D., former Professor of Midwifery in the College; presented by the subscribers.
1868. Bequeathed by Robert Sullivan, Esq., LL.D., Barrister-at-Law, the sum of Four Thousand Pounds for the endowment of Three Scholarships in the Queen's College, Belfast, to be called the Sullivan Scholarships, two of them to be restricted to candidates who shall have acted as Teachers or Assistant Teachers in Irish National Schools for at least two years, and one of them to candidates who shall have been educated in the Royal Academical Institution, Belfast, for at least three years.

These Scholarships are tenable for three years.

1869. Given by William Coates, Esq., a prize, value Thirty Pounds, to be called "The Coates Prize," and to be awarded in the Department of Engineering to the best candidate in a set of Examinations, to be held in the Third term of each Session, and to comprise:—

1. Civil and Mechanical Engineering.
2. Office and Field Work, including Geometrical Drawing and Surveying, Levelling and Measuring, together with any two of the following subjects:—
3. Natural Philosophy applied.
4. Analytical Chemistry.
5. Geology.
6. Mathematics, including specially the elementary principles of the Differential Calculus.

Competition for this Prize in each Session to be open to all persons who are at the time, or were in the preceding year, Students of Engineering in Queen's College, Belfast, going through the Third Session of their Engineering Course, in regular order, or going through the Session which, under the sanction of the Council, in special cases shall stand instead of a Third Session of the Queen's College Engineering Course.

This prize was awarded for four years.

1869. A Bust of the Rev. P. Shuldham Henry, M.D., late President of the College, presented by the Professors and other subscribers.
1871. An oil portrait of George L. Craik, LL.D., former Professor of History and English Literature in the College, and also a photograph group of some of the Professors; presented by Messrs. Marcus Ward & Co.
1871. Bequeathed by John Porter, Esq., the sum of Three Thousand One Hundred and Ten Pounds Eight Shillings and Four Pence for the endowment of Two Scholarships in Queen's College, Belfast, to be called "The Porter Scholarships." These scholarships are each of the annual value of Fifty Pounds, and are tenable for two years. They are open to undergraduates of not less than two years' standing.

Anno.

1873. A deed was executed by William Dunville, Esq., establishing the "Sorella Trust."

This deed, which also provides funds for other educational purposes not connected with the College, endows two Studentships in Queen's College, Belfast, to be called "The Dunville Studentships." These studentships are open to any person who is recognised by the Council or other Governing body of Queen's College, Belfast, as a student of three or more years' standing in any Faculty, provided that the last of the three or more years which give such standing, has been spent in Queen's College, Belfast, and has been the year preceding, or the year but one preceding the examination.

They are given, one, for the encouragement of the study of Mathematical and Physical Science, the other, for the encouragement of the study of Natural Science, in alternate years. Each person obtaining a Studentship receives £45 for the first year, and £100 for the second year.

1873. Given by the Widow and Children of the late John Robinson McClean, Esq., Civil Engineer, London, through the hands of the Rev. P. S. Henry, M.A., the late President, the sum of Five Hundred Pounds, to be expended in the purchase of Scientific works for the Library of Queen's College, Belfast.

1874. Given by the Methodist College, Belfast, one Exhibition, value Ten Pounds, to be awarded annually to the highest answerer among students from the Methodist College who have obtained Literary Scholarships of the first year in Queen's College, Belfast; and another Exhibition, also value Ten Pounds, to the highest answerer among students from the Methodist College, who have obtained Science Scholarships of the First Year in the same College.

No Student can obtain either of these Exhibitions, who has not been at least one year in attendance at the Methodist College previously to his Matriculating in Queen's College, Belfast.

These Exhibitions were awarded for eight years.

1876. Given by the Reverend Arthur Hercules Pakenham, for the endowment of two Scholarships in Queen's College, Belfast, one to be called the "Sir Hercules Pakenham Scholarship," and the other the "Emily Lady Pakenham Scholarship," the sum of One Thousand Pounds, invested in five bonds of £100 each of the Moscow Jaroslaw Railway Company, and five bonds of £100 each of the Churkoff Azov Railway Company.

These Scholarships are given in alternate years, are each tenable for two years, and are open to all students under 20 years of age, matriculated or non-matriculated, on their first entrance into the College.

1877. Given by an anonymous donor, Ten Pounds, to provide for an Entrance Prize of Five Pounds, to be awarded for proficiency in French.

This prize was awarded for two years.

1878. An oil portrait of Alexander Gordon, M.D., former Professor of Surgery in the College; presented by the subscribers.

1880. The subscribers to a testimonial given to Dr. MacDonall on his retirement from the Professorship of Greek, presented to the College, in addition to a portrait of Dr. MacDonall to be placed in the Examination Hall, a collection of Classical and Oriental Works of the value of £275, selected from the library of Dr. MacDonall, to form the nucleus of a department of the Library to be called "The MacDonall Library."

Anno.

1881. The sum of One Thousand Seven Hundred and Ninety-two Pounds Seven Shillings was raised by public subscription, for the establishment of a Scholarship to commemorate the distinguished services, rendered to this College and to Chemical Science, by Dr. Thomas Andrews, F.R.S., the late Vice-President.

At the same time a full-length Oil Portrait of Dr. Andrews was placed in the Examination Hall of the College.

1882. The sum of Eight Hundred and Seventy-five Pounds Six Shillings, in New Three per Cent. Government Stock, being a portion of the bequest of the late Lord Blayney, was transferred to this College by the Queen's University.

1882. A Medal, to be awarded annually, was founded with a portion of the residue of the Peel Fund of the late Queen's University.

1882. An Oil Portrait of William Nesbitt, M.A., former Professor of Latin in the College; presented by the Subscribers.

1889. Bequeathed by John McKane, Esq., LL.D., Barrister-at-Law, former Professor of English Law in the College, a Gold Medal to be awarded annually for answering in Jurisprudence and Political Economy.

1889. An Oil Portrait of the Rev. J. Leslie Porter, D.D., LL.D., late President of the College; presented by the President and Professors.

1890. An Oil Portrait of John Purser, LL.D., Professor of Mathematics in the College; presented by his former students.

1891. Given by Her Majesty's Commissioners of the Exhibition of 1881 the nomination to a Scholarship of the value of £150 per annum, tenable for two, or, under special conditions, for three years, and limited to those branches of Science (such as Physics, Mechanics, and Chemistry), the extension of which is specially important for our national industries.
